It great ! Love the new armor. +Free (Now)

+Nice step into the FPS

-No one is playing it

-Some people paid for it and got nothing in return

2V5

Would be good if there was more than one server with 3 bots up. But there isn't, this game is dead. It used to cost money, but to try to get people to play they made it free without offering any type of skin or anything to the people who did play. So those people quit unhappy that they got nothing for supporting the developers. I'd just get Pavlov instead.

If you liked this review [Click here and follow for more reviews of VR titles. And Click here if you want to request reviews on other VR titles.. Worst port i have ever seen. not worth the money. The graphics and the gameplay is awful.. I enjoyed this game. if your next one has humour like this one. I will get it too.. It's on utube xd. Very good game. play this when angry and can make you distress. Fundamentally broken. Not worth £19.. Nice Game for \\$2.99 But has a lot of BUGS](#)

There isn't much to this game. No trading cards, no steam achievements, and all you can do in-game is care for your horse and so training or speed trials. There is no open world or free-roam option or a chance to finish quests. You can see everything in under an hour. I wouldn't recommend this game except your younger (under 14) players.. fail game! dont buy/play it! + do not buy the badge! h3h3~ =( Great concept for a game but poorly carried out.  
Was this was a rush job leaving many features out?

One the positive side"

- + gives you an understanding of the political ethos
- + the grafic quality of the game is good
- + historically enlightening
- + combat features are quite good
- + research feature ehnces the realistic quality of the game, to this I would add production.

On the negative aspects of the game:

- naval warfare is extreemely poor.
- no manual is available anywhere!!!!
- the tutorial is poor covering only part of the game.

I sugest more work on a fine concept.

One hopes publishers will address these issues by a patch but most likely and profitably (for them) by a another game. Nevertheless I will never buy a Matrix/VWastelands game again without without reading reviews and forums.

I give this game 3 out of 5 stars. This game is extremely difficult as you progress in.

At first, you're like: NO PROBLEM, EZ PEEZE

Then you're like: WHAT THE \u2665\u2665\u2665\u2665, IM NOT A COMPUTER MR DEVELOPER, HOW DO I FIGURE THIS\u2665\u2665\u2665\u2665\u2665OUT?

8V10 would scream again. This is one of the better P&C/HOG's of it's type I've played in a while. Although the cutscenes were slightly blurry for me, all the other graphics were crisp. The art, gameplay, storyline, and voice acting were all pretty good. The one exception for me was whenever the Angel character would appear, they would literally say, "Aaaaannngeeeelllll..." in a whispered reverb that almost seemed as if they meant it to be comical - except that it was clear that was not their intent. Although there was some noticable repetition, the hidden object puzzles were decent w/ about average difficulty. I can only remember a single misnamed object (i.e., "Whistle" that should have been "Scroll"). The mini games were standard issue. There's plenty of gameplay (i.e., duration) and for once the bonus level wasn't a complete waste of time. All in all, I give this game a straightforward recommend.

Once I set the desired graphics options via game's menu, it ran well for me on Linux Mint 18 (Wine/PlayOnLinux). I also had to set the Mint panel to autohide or otherwise it would show even when game was set to fullscreen. The only other noticeable technical issue I experienced was that the game would sometimes take up to 2 minutes to shut down completely after exiting the game via its menu. But it always successfully shut down on it's own without me having to xkill Steam. Other than those things, it played as expected without issue.

PS I almost exclusively play offline. I typically only play online long enough for Steam to allow me to write a review. So Steam only shows that I played 0.1 hrs although I've played at least 5 hrs and have completed both games.. I cannot recommend this at this time. The game costs twice as much as its predecessor Unloved (which I LOVE having clocked over 200+ hours) and has very little content. This was released far to early to be worth \$20 or even \$15. certainly a let down from unloved which had literally hundreds of customization options, lines of story content, and dozens of different rooms in different themes.

I am hopeful because originally when unloved was released it was very content deficient. it did not have trinkets (upgrades and mods and weapon starters), you had exactly three weapons counting melee and one tileset with only a handful of room types. It took awhile to get there but when it did, it really arrived.

I suspect all my reservations will be worked out in a year from now, and by then i'll change my review.. Dead in Vinland is once of the best games I've played in a long time, and my first review in years,

It creates a dark and realistic viking setting, where your goal is to survive. The struggle is brutal and real, all while dealing with very intense social dynamics between your villagers.

You start with 4, and gather others (more options than what you can have, so every game and situation is different). You're forced to pay tribute and manage them all. I consider myself an excellent strategy gamer, but lost after 8 hours but was okay with it and excited to try again.

The struggle was real, quality artwork and rough decisions. Constant micromanagement to excel, with a satisfying conclusion.

Quality of Life tip I found out too late - Right click water or food, then give to villagers so you're not dragging it one at a time.

If you love viking settings and strategy, GET THIS GAME.
