About This Game

Which is longer, past or future?

—April 1st, 2236 A.D.

—99 e-mails were unread.

—99 e-mails from the same sender... her.

This tale began five years earlier, in the spring of 2231. Mankind has evolved a new kind of communication ability called “telepathy”. Yotsuba notices a young girl who does not use telepathy in his first term. In the days that follow, she remains closed off.

One day in the yard at his home, Yotsuba finds a Phillips-head screwdriver. He traces its origin to a nearby abandoned manor, and enters. Inside, he finds something...

The thing that humanity has denied.
The thing that memory has forgotten.

Which is longer, past or future?
This is a novel game to look over "myself"

Title: 2236 A.D.
Genre: Casual, Indie
Developer:
Chloro
Publisher:
Sekai Project
Release Date: 11 May, 2018

I enjoyed this game a lot, its for patient open minded people. I read the uncensored version elsewhere, but decided to buy it here to support the people who made it. There is very little info about the game online or walkthroughs so I will post the codes here to help people who get stuck.

code 1: 0001 which is space 3 times then dot dot dot once
code 2: 2236

Megane mode code: Just adds glasses. No extra content, first code is changed to 1000 in megane mode and a lot of stuff is backwards - I tried 6322 as the second code and nothing happens. There may be hidden content here, currently unknown.

Extra info: Be warned the game will teleport you back to different spots if you put the wrong code in. 0001 worked for me, just reload if you are teleported back. The possibility of hidden content is quite high, towards the end you need to push through a time loop several times, just keep going - there are also several bad ends that are short and can be avoided easily. .
