I'm only four hours in, but I'm really enjoying the game. At first, I was like Iceywind1980 and was about to give up on the game; it ttook me 30 minutes, or so, to get going and figure out how to play. Also, the default difficulty setting is "Difficult," but you can change it in game. The fusion of point-and-click and rpg is really succesful. Solving inventory puzzles, searching the environment, and talking to things is really just as essential to your progress as combat. The writing is very good and never fails to entertain; party dialogue also frequently gives subtle clues as to how to progress. The graphics and animations are good, for this type of game, and add to the enjoyment. The game runs pretty smoothly and load times are minimal. The rpg mechanics are pretty sophsticated for a modestly priced game like this; for instance, your characters earn combat experience based on how much damage they did in the fight. Also, turd zombies. A very enjoyable game.. A bit repetitive.... I don't know if it's just me or what, but it seems I got ripped off from steam again! Man, who puts a trailer of a gameplay with voice and all and then you play this game and realise IT'S JUST THE DAMN MENU! the rest of the game doesn't have voice in the musics, just that boring background song.... I want my money back....;-;. I have played this game for an hour, giving it its chance despite of the ugly interface which unwelcomes the player. The campaign is a succession of battles, devoid of sense. There is no story, and I didn't really get how to expand its army through the different missions. I think I simply cannot. This is all the more regrettable as this kind of bare bones game could beneficiate a lot from a good little well-told story. The other type of game is the dungeon. This one is funnier. Maps are like a maze and you explore it with your units turn by turn just like in a board game. Its is quick-paced and enjoyable. Money can be gathered to expand the size of the army (yes, it works perfectly in the dungeon mode).

But the reason I really DON'T recommand is because there is no options whatosever, and, worst of all, NO SAVEGAMES. If you die, you restart from the beginning. If you leave the game, you restart from the beginning. From the very beginning. Your progress through the dungeons? The army you expanded with gold? All gone, start again. Or not.

It could have been a fun little casual board-like game, but in this state, it can barely be called a game. It is in great need of fixing. However, it has not been updated from a year or so, do just like the devs, and forget it.. i like this Bad time simulator maybe you should sell it for 5.01 so you get a dollar every time someone buys the game 100 times. GOOD GAME is very addicated so much fun asuka best girl fight me but all girls unique so it really hard to choice i like them all but. I was so happy when I got to see that this game will come to steam. I still own the old original cd-rom version, even though it is unplayable due to scratches and once in a while I tend to pick this game up on Scumm to play it again, even though I know every little dialouge and all the riddles.

This is a great game with great humor, great puzzles, loveable characters and enjoyable soundtrack. This was the first game in my life I ever got to play and finish. It brings back great memories of self drawn maps and being forced to remain stuck on riddles for ages because you could not ask the internet for the solutions.

I really do recommend the game itself, because it is just awesome, but... I don't recommend this version.

It is not console-kiddies-in-mind easy. You have to pay attention to your AI bff and check the objectives for more info. Not everything is explained, you have to rely on your gamer's instinct. Not all controls and puzzle mechanics are spelled out for you. Figuring things out is fun and rewarding.

There are convenient autosaves but no excessive F5-ing past each enemy. If you die (you will) mid-mission you may have to start over, as in the good old days (Hard Reset, Rise of the Triad). When you finish a mission it feels like an accomplishment.

Every time you are transported to a new environment, it looks different, there are new enemies, puzzles, more discoveries.

I had a great time with it, did not want it to end. I am so looking forward to the next game to meet Sparky, the sweetest little redeyed ghost.

I recommend this game with all my heart as I enjoyed it with all my heart.

perfect game, perfect actors, perfect story i cant believe how underrated this game is. with this game i finally found sense in my life. no seriously you want to kill yourself as soon as the game begins. I was honestly stunned by how bad this game is. I had a PC version of Risk a few years ago that was awesome. But this game is a disaster. I bought it on an impulse without even reading the reviews first. At only \$3.99, I felt I had little to lose. But even as cheap as it was I regret the purchase.. Surprisingly difficult and deep game for \$3. Great sense of immersion and uses room scale really well. Once you get about 35 blarps, deaths are a little random.. It's kinda bad, very bad modelled vehicles and very stupid NPCs. Glad to have been able to pick this up for free on a giveaway!

It is SURELY NOT worth €18,99. Do NOT buy!. I'm hooked to Tempest 2000. I would prefer a Tempest 3000. But I will not pollute my living room with a Jaguar-Console or a Nuon-compatible DVD player... Now I have this! (again)

It even comes with original PSX feel. Same buttons, same copyright disclaimer... Well, its just a emulation, as it seems. It even asks if I want to use the Memory Card in slot1.

But it lets me play N2O again. <3

. That's easy mind-breaker, but it has a really good sound and a nice design. I would like this on mobile devices. I was just a little disappointed that a watermelon is in the game title, but not in the game itself). The Dark Parables series has always been a favorite. Glad to see some are available on Steam. Hope more will be added in the future. The art style and puzzles make this game series very engrossing. As some gaming laptops are tested for their 3DMark 11 performance, its nice that this software allows me to compare their performance against my gaming desktop.. This game is really fun to play and is based on solving puzzles by making clones of yourself. It has a nice soundtrack, suitably eerie music for its setting and engaging visuals (honestly, I kept jumping along the edges to see more of the world!). The puzzles increase in complexity and the main gameplay style switches half way through to add another layer to the puzzles.

The storyline begins with you waking up in a lab with no knowledge of how you got there. A disembodied voice provides some guidance as you make your way through the facility and dialogue between the two characters helps piece fragmented memories together to explain how you came to be where you are.

There are two outcomes - be sure to find them both!. Fantastic old-school RPG. If you enjoyed the other recent Avernum games from Spiderweb Software, then you'll doubtless enjoy this too.

Some particular new things I've noticed in this one (as of playtime ~5 hrs):

-Improved musical score (note to new players: music only plays in main-menu and opening cut scene). -UI has gotten a nice aesthetic overhaul (functionally it's the same as Avernum 1 & 2). -Animated cut scene setting up the story! This was a welcome touch.

I spent 110 hours on Avernum 2 (just finished it a couple weeks ago); I suspect I will do the same with this one.

Final note: you can play spiderweb's games entirely with one hand, leaving the other free to each cheetos/pet the cat/whatever.
