Video tutorials Live training Daz is the developer and the creator of Daz VTR (Virtual Trainer). Using this virtual trainer, you can learn and enjoy using Windows by simulating the experience of actually using your operating system. Windows 8 - through Daz VTR, users can learn and simulate the operating system by using Windows 8 in DazVTR. A user-friendly interface is presented for all of the functions that are required for interacting with the operating system. Daz VTR is a software and virtual machine that allows the user to interact with the operating system using keyboards, mouse, and the Windows 8 touch screen. Windows 8 is installed on a virtual hard disk (VHD) on the virtual system, then using the controller, it runs like a computer of Windows 8. As a result, you can use all of the Windows 8 features, but you will not need a computer with a touch screen. You can run the virtual Windows 8 system on any Windows computer with the virtualization capability of Windows. Daz VTR has an interactive tutorial and guide for Windows 8. You can use the guide to start your Windows 8 operation and learn how to use all of the functions of the Windows 8 operating system. New features The following features are included with Windows 7 Loader V1.9.7. Support the virtualization technology in Windows Vista and Windows XP and Win7 by Daz VTR. Support Microsoft Remote Desktop Services (RDS). Support a new driver for the operation of Windows 7 on a Windows 8 machine. Support operation of Windows 7 Boot Menu in the virtual system. Support network start of the Windows 7 loader from the virtual system. Support USB Loader to launch USB loader software from the virtual system. Support the hidden system files of Windows 7. Support Windows 7 Boot Menu as a DVD or ISO file. Support Windows 7 driver installation from the virtual system. Support the uninstallation of Windows 7 from the virtual system. Support USB Driver boot in the virtual system. Support the Windows 7 loader to boot from CD/DVD in the virtual system. Support Windows 7 loader to boot from USB Flash Drive. Support the Windows 7 loader in Windows 7 Ultimate and Windows 7 Professional. Support the Windows 7 loader to boot from USB Flash Drive in the virtual system. Support the virtualization and the 82157476af
