HEREMON

Huh, feisty thing.

Hello, I've been a steam user for two years now. Yesterday night I was looking for a game to purchase on the steam store and I saw this game that catch my eye. Call of Duty Infinite Warfare, but I did not buy the regular base game, I bought the digital deluxe editon for the game. So I finished downloading the game I launched it. To be suprised with a error message saying that content needs to download. I left the game for about an hour and I relaunched the game. I saw the same error code again, I went to the games dlc and I saw some content not installed such as Multiplayer, Zombies, Campain. This means I can't play the game at all can I please have some support?. I started liking the game but out of nowhere and for no other reason than to mess with you, the game difficulty escalates and starts to punish you for moves that are part of the strategy. Considering that you don't have any influence on what blocks appear next, I find it unfair that the game punishes me for "idle moves" when they are part of preparing sets. The only good point that still remains for me is the art is done nice and the story so far seems okay. Gives you purpose to play but when your creature has an attribute bonus on the enemy, it shouldn't die easily.. Controls.

Don't just don't.

If one has no controller one has no play. Fast paced, no holds barred retro action!
Just jump in, chill out and blow♥♥♥♥♥♥up! Add in an amazing retro art style
and a fantabulous soundtrack....woot!. This game its very good, i'm recommended everyone. Fun for about five minutes before the mediocrity sets in. Games becomes impossible after a certain amount of idential levels because of bad game design, and is a glitchy mess in places.

This looks like a badass game in the trailer, however when you purchase it, the game is full of glitches. Beginning with NO sound, and the character not being able to walk on certain paths. He can't even walk down a hill without glitches happening. This game was definitely not finished. If you don't mind playing with no sound, and a ton of glitches, I say you may have fun for about 1 hour tops. I only paid 49 cents, so i can't complain too much.. DONT WASTE YOUR MONEY ON THIS PIECE OF♥♥♥♥♥♥GAME.

The AI are nothing like really life players, completely random and unpredictable, it's impossible to play with any kind of strategy, don't waste your money!. Now where do I start.

Ninja Guy : the game that changed my life for the better. this game is the most story rich and beautiful game I have ever had the honor of playing. The characters and level variety make this game one of the best rpgs out there and with the help of cow sensei it is easy and fun to get into the story and gameplay. you can do many combos and in combination with the high quality of graphics this game WILL blow your mind!

This game should at LEAST be 40+ euros but the developers gave us this masterpiece for only 1.99!

Without doubt a 10V10 must buy

. Cool little time sink, reminds me of Stellar Frontier from back in the day, with updated graphics and game play.. I was dying of dehydration as walked out of the jungle. I saw the sniper up on his little perch, so I sang a little tune for safety as I waltzed right in the shack. Once inside, I grabbed the nearest water bottle and chugged it down faster than any previous water bottle challenge contestend. I then proceeded to eat all the carrots, bread, and drank dirty water from a canteen. Now prepared for combat, I walked out and aimed my trusty shotgun at a man tending to the fire. As I screamed my battle cry, "SUCK MY♥♥♥♥♥♥MOTHERF***ER" I shot at him. That man was terrified and ran sanic fast away from me as also gunned down the sniper. As the other ran away, a different guy who heard the shots realized that I ate all his succulent, juicy, orange carrots and moldy bread so as I walked out, he sprayed me down with his AK with less fear than Arnold Schwarzenegger.

The game is very good in my opinion. If you like realistic combat and stuff like that, you'll love it. The dev's seem very

committed to making this game as good as possible and although it needs some adjustments I can already see it shaping into a great game.

Update - The Dev has released a new feature called operation freetown which is more of a fast paced close quarters combat type deal. It's amazing, the combat and gunplay of this game makes it excell in these areas. The game is getting better and better.. It's an OK game. But it does not recognize MANY words that are real words which is extremely annoying! Also, the fact that the sushi has to be in a straight line makes it very difficult to play the game to it's fullest potential.. QUE OTA?!?!?!?! UniBall has been a part of my life for over 17 years on and off and is a game that will always have a special place in my heart for many reasons.

The game itself couldn't be simpler. It plays like a top down game of hockey, with a strong focus on both individual and team skill that is the very definition of easy to play, hard to master. In the gaming world of 2017, this is an indie game that could easily be ignored, but there's a reason why UniBall has stuck around. It is the purest sports game I've ever played, because what you see is what you get. Nothing is obfuscated behind layers of controls, the only limit on your ability is yourself. You move, you maneuver, you boost and you shoot.

The game has a small but loyal community that back at the turn of the millennium were mostly a bunch of idiot teenagers addicted to this game while hurling various insults at each other. In some ways nothing has changed, but the community has grown up together, and are so excited at the possibility of welcoming a new player-base to this small game.

Personally for me, this game is special because it's where I met my wife 15 years ago (Adman <3 Sevendust), and made many life-long friendships along the way. So, please give this game a try. It's not pretty, but it has a heart and a sense of community that triple A games wished they could ever match. I've given it thousands of hours of my life, but got something truly special in return.
